

NWE Rate Hikes and MSTI

You may have read that Northwestern Energy is asking for three rate hikes. That's nothing compared to what Montana rate payers will pay if NWE is allowed to build the **Mountain States Transmission Intertie (MSTI)** and ship our legacy hydro and coal energy to California. If this happens, Montana will be buying back our energy at California prices – if we can buy it back at all. Call your state legislator today to ask what they will do to protect Montana rate payers from NWE's MSTI.
