

New Wind Farms in U.S. Do Not Bring Jobs

Think the wind boom is also a jobs boom? Think again. An *ABC News* report by Jonathan Karl, entitled "**New Wind Farms in the U.S. Do Not Bring Jobs,**" dispels the myth of American jobs being created by the massive stimulus spending on wind energy (see <http://abcnews.go.com/WN/wind-power-equal-job-power/story?id=9759949>). Investigative reporting by Russ Choma reveals that by a margin of almost 4 to1, **foreign companies dominate** the stimulus program that has distributed billions of US tax money (see <http://investigativereportingworkshop.org/investigations/wind-energy-funds-going-overseas/story/renewable-energy-money-still-going-abroad/>).
