

# **Whitehall is not on MSTI maps.**

Montana DEQ forgot to put Whitehall on the maps in the MSTI “preliminary” draft environmental impact statement. That’s how little local people have mattered to the process. NorthWestern Energy made a business/political decision that it would be easier and cheaper to **cram MSTI down the throats of communities and families** than fight well-financed environmental groups over using public land routes. **Our towns and families** have been targeted for no reason other than expedience.
